

## 1D, QR code and 13,56 MHz RFID barcode reader

QR Code RFID Reader Access Control QR Code Scanner with Wiegand, RS232, RS485, Ethernet, USB. QR80-MF QR Code Access Card Reader is our new intelligent Access Card Reader, Fast reading speed, High recognition rate, Strong compatibility, can connect to any Wiegand input controller, widely used at Office access management, Tourism management, Community visitor access management, Administration Service Hall management, Gates access control, Visitors intelligent machines, Smart home; Upgrade old access control systems etc.

### Technical information:

|                                  |                                   |
|----------------------------------|-----------------------------------|
| Communication interface - output | Wiegand 26/34, RS232, USB, TCP/IP |
| Identification types             | QR/Card identification-13.56 MHz  |
| Mounting method                  | Built-in                          |
| Reading Range (mm)               | <100                              |
| Reading time (s)                 | 3                                 |
| LED indicator                    | +                                 |
| Beeper                           | +                                 |
| Average failure time (hours)     | >10000                            |
| Dimension (mm)                   | 86x86x24                          |
| Voltage                          | 12VDC                             |
| Current                          | 800mA                             |
| Protection Rating                | IP 44                             |
| Material                         | Plastic                           |
| Operating temperature, °C        | -20 - +50                         |
